SUMMARY

Senior Cloud Engineer with 5+ years of experience delivering secure, scalable, and highly available cloud solutions across enterprise technology, banking, and marketing analytics domains. Experienced in cloud architecture, automation, CI/CD, and observability, driving efficient and reliable deployments. Proven ability to improve system uptime, streamline operations, and reduce operational errors. Skilled at managing large-scale data workflows and ensuring compliance with security standards. Adept at collaborating with cross-functional teams to deliver cloud solutions that meet business objectives and support growth.

SKILLS

Programming & Scripting: Python, Bash

Cloud Platforms & Services: AWS (EC2, S3, Lambda, CloudFormation, IAM, VPC, Auto Scaling, Load Balancing, CloudWatch, CloudTrail)

Databases: RDS, MySQL, PostgreSQL, DynamoDB

Operating Systems & Environment: Windows, Linux (Red Hat, Ubuntu), Unix

Infrastructure & Automation: Terraform, Ansible, Docker, Kubernetes (K8s), Helm

CI/CD & Version Control: Git, GitHub, Jenkins

Monitoring, Observability & Security: Prometheus, ELK Stack, CloudWatch, Splunk, Grafana, IAM, Security Groups, Access Control, AWS Secrets Manager, OAuth2

Project Management: Agile, Waterfall, SDLC, JIRA, Confluence

Soft Skills & Collaboration: Problem Solving, Collaboration, Attention to Detail, Time Management, Critical Thinking

PROFESSIONAL EXPERIENCE

Senior Cloud Engineer, Dell Technologies **Feb 2025 - Present | TX**

- Architected multi-tier enterprise applications using EC2 instances, S3, and RDS/PostgreSQL, improving system uptime to 99.9% across 25+ enterprise services and handling over 1 million records daily.
- Automated cloud provisioning and deployment workflows with Terraform and Jenkins, reducing deployment errors by 40% and accelerating environment setup for 15 production environments, supporting 500+ internal requests weekly.
- Enhanced system observability by configuring Prometheus and Grafana dashboards, enabling 30% faster resolution of performance bottlenecks across 50+ distributed applications.
- Implemented security measures using IAM, Access Control, and AWS Secrets Manager, safeguarding sensitive enterprise data and achieving 100% audit compliance.
- Facilitated project delivery through Agile planning, sprint coordination, and Collaboration with cross-functional teams, accelerating feature rollout by 20% for enterprise cloud solutions impacting 10,000+ internal users.
- Documented architecture diagrams, deployment processes, and operational workflows in Confluence, improving onboarding efficiency and reducing knowledge gaps for 10+ new engineers per quarter.

AWS Cloud Engineer, Northern Trust **Nov 2022 - Jan 2025 | TX**

- Designed serverless banking workflows using Lambda, CloudFormation, and DynamoDB, reducing transaction latency by 30% for over 10,000 daily users and processing 1.2 million financial records monthly.
- Developed CI/CD pipelines with GitHub and Docker, automating microservice deployments and reducing integration issues by 45% across multiple microservices.
- Monitored system performance with CloudWatch and ELK Stack, detecting anomalies and reducing downtime by 35%, ensuring uninterrupted service for 3 regional offices.
- Enforced access control policies using Security Groups and OAuth2, mitigating 25% of potential security incidents and protecting sensitive financial data for over 20,000 accounts.
- Streamlined infrastructure updates using Ansible, reducing maintenance time while improving reliability for 40+ production servers supporting core banking services.
- Coordinated project tasks using JIRA, tracking deliverables and timelines to achieve 95% on-time delivery of cloud-based financial solutions across critical banking operations.

Cloud Engineer, Epsilon **May 2019 – Oct 2022 | MI**

- Deployed marketing data pipelines within VPC using CloudTrail, RDS, and MySQL, securely processing 500GB of daily data across 15+ campaigns and over 1 million marketing records.
- Developed automation scripts with Python and Bash, reducing repetitive operational tasks by 40% and accelerating environment provisioning for 8+ active projects, impacting 5,000+ campaign requests weekly.
- Containerized analytics applications using Kubernetes and Helm, enabling scalable deployments that handled a 3x increase in concurrent workloads during peak marketing campaigns.
- Monitored workflows with Splunk, improving log accuracy by 35% and reducing incident response time by 25%, analyzing millions of log events monthly.
- Maintained servers on Windows and Linux (Red Hat, Ubuntu), performing updates, troubleshooting, and configuration management, achieving 99% uptime across internal analytics applications.
- Supported iterative release planning and deployments using SDLC methodology, ensuring timely delivery of 12+ cloud-based marketing analytics projects while maintaining effective collaboration with stakeholders.

EDUCATION

Bachelor of Laws (LL.B.) in Law and Political Science

University of Dschang, Dschang, West Region, Cameroon **Mar 2012 – Apr 2016**
